互聯網保安技術入門   **122-149350-01**
Introduction to Internet Security

This course will introduce the various techniques in network and internet security to participants, with emphasis on the physical network security systems. Various case studies of the employment of security systems in network systems will be presented. Course content includes: (1) Firewall tool kits; (2) TCP wrappers and packet filtering software; (3) Network monitoring tools; (4) Applications, including on the Internet. No hands-on practice on PC will be provided.
 Participants are expected to have completed the course "Introduction to Computer Security" (149340) or equivalent.
